### **Climate Change Policy**

1. Logan Group Company Limited is committed to protecting the environment and minimizing the impact of all activities of the Company on the environment.
2. We will abide by the following principles:
  - 1) Reduce our carbon footprint by setting and implementing long-term carbon emission reduction targets;
  - 2) Reduce pollution and carbon emissions by protecting natural resources, saving energy, reducing and recycling waste;
  - 3) Increase the use of renewable energy through on-site power generation, outsourcing of renewable energy and other feasible methods;
  - 4) The establishment of environmental protection objectives and guidelines will help us achieve sustainable environmental improvements;
  - 5) Consider climate change factors in the procurement process and encourage the use of low-carbon and energy-efficient products and materials;

- 6) Through regular training, we will educate and enhance the environmental awareness of employees, partners and contractors, and convey the environmental protection policy through internal and external communication channels;
  - 7) Formulate appropriate operation procedures and measures to prevent or reduce the damage caused by climate change to the Company, and grasp the relevant opportunities brought by climate change;
  - 8) Comply with all relevant environmental protection laws and other relevant environmental protection requirements, and strive to achieve a higher level of environmental protection;
  - 9) Set up an emergency management plan to deal with extreme weather issues caused by climate change;
  - 10) Strengthen resilience and monitor the impact of climate change on business and the Company's carbon management objectives and objectives;
  - 11) Communicate with stakeholders such as employees, suppliers, and local communities to convey information about the impact of climate change and the Company's climate change strategy to improve their ability to withstand climate change.
3. We will review this policy every year.
