Waste Management Policy

1. Logan Group Company Limited is committed to the effective management and reduction of waste during the entire operation process through the design, construction and daily management of buildings.
2. According to the Company's waste management policy:
 - 1) The Company will comprehensively assess the impact of discarded waste in various commercial activities, including daily office work, construction and demolition projects, and set relevant objectives to improve the Company's waste;
 - 2) The Company's waste management is in accordance with the relevant industry standards, adhering to the Company's standard requirements and incorporating the best methods in the industry;
 - 3) The Company will formulate, monitor and regularly review the Company's waste management goals and objectives;
 - 4) The Company will release the relevant achievements of waste

management to the public by announcing the progress of waste management objectives every year;

- 5) In the procurement process, the Company will take waste reduction into consideration, and encourage the use of recycled or upgraded materials;
- 6) The Company will communicate our waste management policies and requirements to partners including employees, suppliers and partners;
- 7) The Company encourages employees, suppliers and partners to avoid, reuse, and recycle wasting, so as to reduce the daily waste generated when feasible;

3. We will review this policy every year.
